CELL Pop-up Blocker Instructions

This document describes how to adjust the pop up blocking of MS Explorer. The actual version you have may have a slightly different look. This instruction is based upon MS Explorer 7.

The best way is for you to allow the CELL website to present Pop-ups is by adjusting your settings prior to beginning to view a presentation. We do not have any advertising, which is what the blocking feature is meant to stop.

With you web browser open you will click on the "Tools" menu item as shown and mover your pointer to the "**Pop-up Blocker**" then over to "**Pop-up Blocker Settings**".
